Project Report
on Company Team Member Web Page

1. **Introduction:**
   - The project involves the creation of a web page to showcase company team members using HTML and CSS.
   - The goal is to provide a visually appealing and informative platform for team members and stakeholders.

2. **Objectives:**
   - Develop a user-friendly web page highlighting key team members.
   - Showcase individual profiles, roles, and skills.
   - Foster a sense of connection and collaboration within the company.

3. **Design and Structure:**
   - Utilize HTML for structuring the content and CSS for styling.
   - Adopt a responsive design for seamless viewing across various devices.
   - Incorporate a clean and professional layout to enhance user experience.

4. **HTML Structure:**
   - Create an HTML structure with appropriate tags for headers, paragraphs, lists, and images.
   - Utilize semantic HTML to enhance accessibility

5. **CSS Styling:**
   - Apply CSS styles to achieve a consistent and visually appealing design.
   - Implement color schemes, fonts, and layout techniques for a cohesive look.
   - Ensure responsiveness through media queries for different screen sizes.

6. **Individual Profiles:**
   - Design a section for each team member's profile.
   - Include elements such as name, position, brief bio, and a professional image.

7. **Navigation:**
   - Create a navigation menu to easily switch between team member profiles.
   - Ensure intuitive navigation for a seamless user journey.

8. **Testing:**
   - Conduct thorough testing across different browsers and devices to ensure compatibility.
   - Address any issues related to layout, responsiveness, or performance.

9. **Deployment:**
   - suitable hosting for this web page is google chrome and microsoft edge .
